

For the project on the MU site it will look like this:

EXAMPLE 1

MAY 2025

Fri 16 May | English Premier League

Chelsea  20:15  Man Utd

sky sports

OR:

Sun 25 May | English Premier League

Man Utd  16:00  Aston Villa

Old Trafford

TICKET INFO →

EXAMPLE 2

```
<div class="fixture-title" id="2444844"></div>
<div == $0
  <div class="Matches_fixture">
    <div class="fixture-details" tabindex="0" aria-expanded="false">
      <div class="accord-btn">
        <i class="icon-down"></i>
      </div>
    </div>
    <li class="first-team">
      <span>
        
      </span>
      <span class="team_name manu-normal">
        "Man Utd"
        <span class="screenreader"> versus</span>
      </span>
    </li>
    <li class="second-team">
      <span>
        
      </span>
      <span class="team_name">Aston Villa</span>
    </li>
    <li class="fixture-score">
      <p>
        <span class="screenreader">time</span>
        <span class="match">16:00</span>
      </p>
    </li>
  </ul>
  <span class="team-venue">Old Trafford</span>
  <div class="fixture-channels">
    <a href="https://tickets.manutd.com/en-GB/categories/home-tickets" aria-describedby="2444844">
      <span>TICKET INFO</span>
      <i class="tag-red-arrow"></i>
    </a>
  </div>
</div>
</div>
```

line each matches -- fixture class
it will contain an team-venue
class if the element inner
Text ==
Old Trafford
then I'll collect the event
info

THE INFO I WANT TO COLLECT

- .first-team > .team__name
- .second-team > team__name
- .Match

```
<div class="fixture-title" id="2444844"></div>
<div> == $0
